Description

You are bidding on a super nice Raytheon CK722 Germanium Transistor still in the package with full leads. It looks to me like this transistor was never touched before I opened it to take pictures. You won't find one any better than this. Please note: white lines on package are glare from camera flash. Your satisfaction is guaranteed or return the item in 7 days in original condition for a full refund. Transistor is also tested and guaranteed to work. Winner also gets a bonus transistor socket so you can experiment with the transistor without damaging the leads. You can add a one transistor amplifier to your crystal radio, build an old time code practice oscillator, or just keep this as a true piece of semiconductor history. Flat rate shipping in the USA for this item is \$1.00 boxed First Class or \$3.85 for Priority Mail. International bidders pay actual shipping. Thanks for viewing my auction and good luck if you decide to bid.
